BAL40 Bushfire Rated Windows and Doors

Thermotek offers Australia's largest, premium range of uPVC, BAL40 bushfire rated products.

- Developed, tested and complies with stringent BAL40 requirements.
- Designed by Aluplast and certified to meet and exceed BCA requirements:
BAL40 compliance under Australian Standard AS3959-2018.

Our products protect homes and maintain high standards of insulation, functionality, and style. Affordable and available in an extended range of inwards and outwards opening styles.

Smart Slide

Many Australian homes are in areas prone to bushfire attack. There is more stringency in the selection of windows and doors in bushfire-prone areas (BCA; AS3959-2018). These changes aim to reduce the risk of loss of life or damage to property in bushfire areas. Our BAL40 products use the latest technology in German hardware. They incorporate the latest in soft coat Low-E technology from Viridian. This creates a safer barrier for your home. It improves your everyday comfort a great deal. Low-E increases the insulating properties of double glazing. This keeps you cooler in summer and warmer in winter. What's more, you no longer need expensive fire screens and shutters on entrance and sliding doors.

Our windows and doors give you peace of mind as well as an extra layer of comfort.

Experience Australia's most affordable, energy-efficient, BAL-40 bushfire rated range. Developed, tested and manufactured as suitable for use in a BAL40 zone.
